TABLE OF CONTENTS: 2019 AWPA BOOK OF STANDARDS

Introduction – Page 1

Use Category System Standards – Page 5
U1-19: User Specification for Treated Wood
1. Introduction to the Use Category System .......... 5
2. Service Conditions for Use Category Designations .... 6
3. Guide to Treated Wood End Uses ................. 10
4. Standardized Preservatives ......................... 15
5. Species and Species Groupings ...................... 17

Commodity Specifications .............................. 23
A. Sawn Products ............................................. 24
B. Posts ......................................................... 41
C. Crossties and Switchties ............................. 48
D. Poles ......................................................... 50
E. Round Timber Piling .................................. 56
F. Pressure-Treated Wood Composites ............ 58
G. Marine Applications .................................. 64
H. Fire Retardant Treated Products ............... 70
J. Non-Pressure Treated Wood Composites ....... 73
K. Barrier Protection Systems ......................... 74

T1-19: Processing and Treatment Standard
Introduction .................................................. 77
1. General Requirements ................................. 78
2. Treatment .................................................. 79
3. Results of Treatment .................................... 80
4. Preservatives ............................................. 85
5. Quality Control and Inspection .................... 85
6. Retreatment .............................................. 85
7. Drying After Treatment ................................ 85

Special Requirements by Commodity .............. 86
A. Sawn Products ............................................. 86
B. Posts ......................................................... 91
C. Crossties and Switchties ............................. 94
D. Poles ......................................................... 96
E. Round Timber Piles .................................. 103
F. Pressure-Treated Wood Composites ............ 105
G. Marine Applications .................................. 109
H. Fire Retardant Treated Products ............... 113
I. Millwork and Manufactured Goods .............. 114
J. Non-Pressure Treated Wood Composites ....... 115

Preservative/Protectant Standards – Page 119
P1/P13-19: Standard for Creosote Preservative ....... 119
P2-19: Standard for Creosote Solution .................. 120
P3-19: Standard for Creosote-Petroleum Solution .... 121
P20-18: All Barrier Protection Systems ............... 122
P22-14: Standard for Ammoniacal Copper Zinc Arsenate (ACZA) .... 124
P23-14: Standard for Chromated Copper Arsenate Type C (CCA-C) .... 125
P24-19: Standard for Alkyl Ammonium Compound, Waterborne (AAC-W) .... 126
P25-16: Standard for Inorganic Boron (SBX) ....... 127
P26-14: Standard for Alkaline Copper Quat Type A (ACQ-A) .... 128
P27-14: Standard for Alkaline Copper Quat Type B (ACQ-B) .... 129
P28-14: Standard for Alkaline Copper Quat Type C (ACQ-C) .... 130
P29-14: Standard for Alkaline Copper Quat Type D (ACQ-D) .... 131
P32-19: Standard for Copper Azole Type B (CA-B) .... 132
P33-18: Standard for Copper HDO Type A (CX-A) .... 133
P34-14: Standard for Copper Naphthenate, Waterborne (CuN-W) .... 134
P35-16: Standard for Pentachlorophenol (PCP) .... 135
P36-16: Standard for Copper Naphthenate (CuN) .... 136
P37-17: Standard for Oxine Copper (Copper 8 Quinolinolate) (Cu8) .... 137
P38-19: Standard for Alkyl Ammonium Compound, Waterborne (AAC) .... 138
P39-18: Standard for 4,5-Dichloro-2-N-Octyl-4-Isothiazolin-3-One (DCOI) .... 139
P40-19: Standard for 3-Iodo-2-Propynyl Butyl Carbamate (IPBC) .... 140
P41-14: Standard for Tebuconazole (TEB) .... 141
P42-19: Standard for Propiconazole (PPZ) .... 142
P45-14: Standard for Propiconazole Tebuconazole Imidacloprid (PTI) .... 143
P47-14: Standard for DCOI/Imidacloprid/Stabilizer, Waterborne (EL2) .... 144
P48-15: Standard for Copper Azole Type C (CA-C) .... 145
P49-15: Standard for Fire Retardant FR-1 (FR-1) .... 146
P50-15: Standard for Fire Retardant FR-2 (FR-2) .... 147
P51-14: Standard for Zinc Borate (ZB) .... 148

A41-18: Standard Method for Determination of Naphthenic Acid in Copper Naphthenate in Wood and Treating Solutions by Gas Chromatography ................................................................. 234
A42-14: Standard Method for Determination of Technical Permethrin and Permethrin Isomers by HPLC Using UV Detection .................................................................................................. 238
A43-14: Standard Method for Analysis of Imidacloprid in Wood and Waterborne Formulations ............................................................... 241
A46-14: Standard Method for Determining MCS Stabilizer Concentration in EL2 Treatment Solution Samples by Turbidity Measurement .... 243
A47-14: Standard Method for Determination of MCS Stabilizer Concentration in EL2 Treated Wood and Wood Treatment Solutions .................. 244
A48-15: Standard Method for Analysis of Propiconazole, Tebuconazole and Imidacloprid in Solutions and Treated Wood Products by High Performance Liquid Chromatography ........................................ 247
A49-15: Standard for Determination of Heartwood in Pines and Douglas-fir ............................................................................................... 249
A50-18: Standard Method for Determination of Percent Bound Acetyl and Free Acetic Acid in Acetylated Wood by High Performance Liquid Chromatography ........................................................................................................ 251
A51-19: Standard Method for Determining Penetration of Protectant in Acetylated Wood ................................................................. 256
A52-17: Standard Method for the Distillation of Creosote and Creosote Solutions .................................................................................... 257
A53-17: Standard Method for the Determination of the Amount of Xylene Insoluble Matter in Creosote and Creosote Solutions ................................................................. 261
A54-17: Alternate Standard Method for the Determination of the Amount of Xylene Insoluble Matter in Creosote and Creosote Solutions .................................................................................... 263
A55-17: Standard Method for the Determination of the Specific Gravity of Oil-Type Preservatives .......................................................... 265
A57-17: Standard Method for the Determination of Water in Oil-Type Preservatives .......................................................................................... 266
A58-17: Standard Method for Determining Conformance of Distillation Fractions of Creosote or Creosote Solution to Specific Gravity Requirements .................................................................................. 268
A59-17: Standard Method for the Determination of Ammonia in Ammoniacal Preservatives and Fire Retardant Formulations ........................................................................................................ 269
A60-17: Standard Method for the Determination of Arsenic in Arsenic Containing Preservatives ........................................................................ 270
A61-17: Standard Method for the Determination of Copper in Copper Containing Preservatives ........................................................................ 272
A62-17: Standard Method to Determine the pH of Waterborne Treating Solutions ................................................................. 274
A63-17: Standard Method to Determine the Valency State of the Arsenic Component of Arsenic Containing Solutions .......................................................................................................... 275
A64-17: Standard Method to Determine the Amount of Boron Trioxide in Sodium Borate Wood Preservatives .......................................................................................................................... 276
A65-15: Standard Method to Determine the Amount of Boron in Treated Wood Using Azomethine-H or Carmine Acid .................................................................................................................. 278
A66-17: Standard Method for Determination of Chromium in Chromium Containing Preservatives .......................................................................................... 280
A67-18: Standard Method for Determination of Carbonate in Ammoniacal Copper Zinc Arsenate .......................................................................................................................... 282
A68-16: Standard Method for Determining Penetration of Boron-Containing Preservatives and Fire Retardants .................................................................................................................. 284
A69-18: Standard Method to Determine the Penetration of Copper Containing Preservatives .......................................................................................... 285
A70-18: Standard Method to Determine the Penetration of Pentachlorophenol Using a Silver-Copper Complex Known as Penta-Check .................................................................................. 286
A71-18: Standard Method to Determine the Penetration of Solvent Used with Oil-Soluble Preservatives .......................................................................................................................... 287
A72-18: Standard Method to Determine the Penetration of Copper in Wood Using Rubeanic Acid .......................................................................................... 288
A73-18: Standard Method to Determine the Penetration of Phosphorus Containing Fire Retardants .......................................................................................................................... 289
A74-18: Standard Method to Determine the Presence of Hexavalent Chromium (VI) in Wood Treated with Chromium Containing Preservatives .......................................................................................... 290
A75-18: Standard Method to Determine the Penetration of Pentachlorophenol in Poles by X-Ray Fluorescence .......................................................................................................................... 291
A76-14: Method for Determining Penetration of Copper-Containing Preservatives .......................................................................................................................... 292
A77-18: Beilstein Test for Determining Presence or Penetration of Pentachlorophenol (PCP) in Wood .......................................................................................................................... 293
A78-16: Standard Method to Determine the Penetration of Boron Containing Preservatives and Fire Retardants .......................................................................................................................... 294
A79-18: Standard Method for Determination of Total Acidity for Calculating Pentachlorophenol in Dry Chemical .......................................................................................................................... 295
A80-18: Standard Method for Determination of Alkali Insoluble Material in Pentachlorophenol .......................................................................................................................... 297
### Miscellaneous Standards – Page 327

- M1-18: Standard for the Purchase of Treated Wood Products ................................................................. 327
- M2-19: Standard for Fixation/Stabilization of Commercial Use Preservative Treated Products for Residential and Commercial Use .................................................. 367
- M23-16: Third-Party Agency Assessment of Testing Plant Internal Quality Control (IQC) .................................................. 362
- M24-15: Standard for Quality Control and Inspection of Preservative Treated Products for Residential and Commercial Use .................................................. 367
- M25-19: Standard for Quality Control and Inspection of Nonpressure Preservative Treated Composite Wood Products .................................................. 365
- M26-17: Guidelines for Fixation/Stabilization of Waterborne Preservatives in Poles .................................................. 374

### Evaluation Standards – Page 379

- E1-17: Laboratory Methods for Evaluating the Termite Resistance of Wood-Based Materials: Choice and No-Choice Tests .................................................. 379
- E4-15: Standard Method of Testing Water Repellency of Pressure Treated Wood .................................................. 384
- E5-15: Standard Field Test for Evaluation of Wood Preservatives to be Used in Marine Applications (UC5A, UC5B, UC5C); Panel and Block Tests .................................................. 386
- E7-15: Standard Field Test for Evaluation of Wood Preservatives to be Used in Ground Contact (UC4A, UC4B, UC4C); Stake Test .................................................. 390
- E8-15: Standard Field Test for Evaluation of Wood Preservatives to be Used in Ground Contact (UC4A, UC4B, UC4C); Post Test .................................................. 398
- E9-15: Standard Field Test for Evaluation of Wood Preservatives to be Used Above Ground (UC3A and UC3B); L-Joint Test .................................................. 402
- E10-16: Laboratory Method for Evaluating the Decay Resistance of Wood-Based Materials Against Pure Basidiomycete Cultures: Soil/Block Test .................................................. 406
- E11-16: Standard Method for Accelerated Evaluation of Preservative Leaching .................................................. 418
- E12-15: Standard Method of Determining Corrosion of Metal in Contact with Treated Wood .................................................. 421
- E13-15: Standard Method of Testing to Determine if Lumber has been Pressure Treated with a Water Repellent .................................................. 424
E14-16: Laboratory Method for Rapidly Evaluating the Decay Resistance of Wood-Based Materials in Ground Contact: Soil Bed Test .................................................. 425

E15-17: Laboratory Method for Evaluating the Efficacy of Diffusible or Volatile Remedial Preservatives Against Pure Basidiomycete Cultures: Inoculated Block Test ........................................... 430

E16-16: Standard Field Test for Evaluation of Wood Preservatives to be Used Above Ground (UC3B); Horizontal Lap-Joint Test ..................................................... 433

E17-15: Standard Method for Determining Corrosion Rates of Metals in Contact with Treating Solution .................. 438

E18-18: Standard Field Test for Evaluation of Wood Preservatives to Be Used Above Ground (UC3B); Ground Proximity Decay Test ............................................. 440

E19-16: Standard Method for Determining Preservative Fixation of Inorganic Waterborne Wood Preservatives ................................................................. 445

E20-15: Standard Method for Determining the Depletion of Wood Preservatives in Soil Contact .............. 447

E21-18: Standard Field Test for Evaluation of Wood Preservatives to Be Used for Interior Applications (UC1 and UC2); Full-Size Commodity Termite Test .............. 450

E22-16: Laboratory Method for Rapidly Evaluating the Decay Resistance of Wood-Based Materials Against Pure Basidiomycete Cultures Using Compression Strength: Soil/Wafer Test ........................................ 455

E23-16: Laboratory Method for Rapidly Evaluating the Decay Resistance of Wood-Based Materials in Ground Contact Using Static Bending: Soil Jar Test ........... 463

E24-16: Laboratory Method for Evaluating the Mold Resistance of Wood-Based Materials: Mold Chamber Test ................................................................. 467

E25-15: Standard Field Test for Evaluation of Wood Preservatives to Be Used Above Ground (UC3B); Decking Test ................................................................. 472

E26-15: Standard Field Test for Evaluation of Wood Preservatives to Be Used for Interior Applications (UC1 and UC2); Ground Proximity Termite Test .............. 476

E27-15: Standard Field Test for Evaluation of Wood Preservatives to Be Used Above Ground (UC3B); Accelerated Horizontal Lap Joint Test ........................................ 483

E28-16: Standard Field Test for Serviceability of Decking ................................................................. 488

E29-15: Antisapstain Field Test Method for Green Lumber ................................................................. 491

E31-18: Standard Field Test for Evaluation of Field-Cut Preservatives to Be Used in Ground Contact (UC4): Block Test ........................................................................................................................................................................... 499

E32-18: Standard Field Test for Evaluation of Field-Cut Preservatives to Be Used Above Ground (UC3B): Modified Post and Rail Test ........................................... 501

E33-18: Standard Test Method of Evaluating Wood Preservatives Against Decay in Use Category UC2 ........ 504

**Guidance Documents – Page 529**

GDA-17: Data Requirement Guidelines for Listing Wood Preservatives in the AWPA Standards .......... 529

GDB-13: Guidelines for Evaluating New Fire Retardants for Consideration by AWPA .......................... 538

GDC-13: Protocol for Standardization of New Millwork Preservative Systems ........................................ 542

GDD-13: Protocol for Standardization of New Wood Preservative Finishes ........................................... 544

GDE-15: Recommended Method for Determining the Treatability of a Species for Inclusion in the AWPA Use Category System Commodity Specifications for Sawn Material ................................................................. 547

GDF-17: Guidelines for Evaluating Composite Wood Products Preservative Treated Using Nonpressure Processes ................................................................. 549

GDH-13: Evaluating Preservatives for Remedial Treatment ........................................................................ 557

GDI-13: Reaffirmation Requirement Guidelines ........................................ 561

GDJ-13: Preservatives Review Board Procedures (suspended) ........................................................................ 564

GDK-13: Data Requirement Guidelines for Solvents Used with Oil-borne Preservatives ..................... 565

GDL-15: Data Requirement Guidelines for Listing Chemically Modified Wood with Enhanced Durability in the AWPA Standards .................................................... 571

GDM-13: Data Requirement Guidelines for Evaluating Performance Enhancing Additives (PEA) ........ 577

GDN-13: Data Requirements for Listing Thermally Modified Wood with Enhanced Durability in the AWPA Standards .................................................................................. 579

Recently Withdrawn AWPA Standards

A1-15: Standard Methods for Analysis of Creosote and Oil-Type Preservatives
A2-15: Standard Methods for Analysis of Waterborne Preservatives and Fire Retardant Formulations
A3-15: Standard Methods for Determining Penetration of Preservatives and Fire Retardants
A5-15: Standard Methods for Analysis of Oil-Borne Preservatives
A32-10: Standard Method for Measuring Losses of Inorganic Preservatives from Treated Wood
A38-04: Standard Method for Determination of PXTS in Treated Wood by HPLC with UV Detection
A39-05: Standard Method for Determination of PXTS in Wood Treatment Solutions by HPLC with UV Detection
A44-08: Standard Method for Determination of Cyproconazole in Solventborne Wood Treating Solutions by HPLC
A45-08: Standard Method for Determination of Cyproconazole in Wood Extracts by HPLC
A56-11: Standard Method for the Determination of the Specific Gravity of Distillation Fractions and Residue
A84-12: Standard Method for Determination of Copper in Copper Naphthenate Solution or in Wood Treated with Copper Naphthenate
A89-12: Standard Method for Colorimetric Analysis of Copper in Copper Naphthenate Treated Wood or Copper Naphthenate Solutions
E6-05: Standard Method for Determining the Equilibrium Moisture Content of Treated Wood
M18-05: Standard Quality Control Procedures for Permanent Wood Foundation Materials
P4-11: Standard for Petroleum Oil for Blending with Creosote
P5-11: Standard for Waterborne Preservatives
P8-14: Standard for Oil-Borne Preservatives
P9-10: Standards for Solvents and Formulations for Organic Preservative Systems
P18-14: Nonpressure Preservatives
P19-04: Standard for Oligomeric Alkylphenol Polysulfide (PXTS) Preservative
P21-11: Standard for Acid Copper Chromate (ACC)
P30-08: Standard for Copper bis(dimethylthiocarbamate) (CDDC)
P43-08: Standard for Chlorpyrifos (CPF)
P44-08: Standard for Permethrin (PER)
P46-08: Standard for Cyproconazole (CPZ)
P54-09: Standard for Alkaline Copper DCOI (ACD)

Notes:

AWPA "C Standards" (e.g., C1, C2, C9, etc.) were last updated during the Fall 2002 Standardization Cycle and final editions were printed in the 2003 and 2004 AWPA Books of Standards. All specifications for treated wood products from the C Standards are now found in the AWPA Use Category System Standards U1 and T1. If you are a specifier, you may simply change all of your C Standard references to AWPA Standard U1. If you are a manufacturer of treated wood products, you will need to refer to Standard T1 for the treating requirements to enable you to determine conformance to Standard U1. If references to the C Standards are still needed, individual standards may be purchased online at www.awpa.com or by contacting AWPA to purchase older editions of the Book of Standards.

AWPA "F Standards" (e.g., F1, F2, etc.) were withdrawn as AWPA Standards during the Fall 2008 Standardization Cycle and are now printed as "Factors" tables in the back of the AWPA Book of Standards.
